HPAI outbreaks in Italy

PAFF Committee – Animal health and welfare

HPAI H5N1 in Italy

updated 18/11/2025

✓ **SF7** 20 HPAI outbreaks in poultry

- 7 Emilia - Romagna
- 6 Lombardia
- 3 Veneto
- 3 Piemonte
- 1 Friuli – Venezia Giulia

✓ **SF8** 45 HPAI positive cases in wild birds

- 28 Friuli – Venezia Giulia
- 8 Veneto
- 6 Lombardia
- 1 Emilia - Romagna

Regular update on: <https://www.izsvenezie.com/reference-laboratories/avian-influenza-newcastle-disease/italy-update/>
<https://eurlaidata.izsvenezie.it/>

Slide 2

SF7 sono inclusi gli ultimi due focolai di Varese e Guidizzolo

Scolamacchia Francesca, 18/11/2025

SF8 sono inclusi tutti i selvatici notificati come positivi in data 14 e 18 novembre in FVG e Veneto

Scolamacchia Francesca, 18/11/2025

HPAI H5N1 epidemic curve

HPAI H5N1 in poultry

- The epidemic season in poultry started in week 40, matching the onset in 2024, affecting the periphery of the HDPa
- In contrast to 2024, the first cases within the core HDPa were detected about two months earlier

Region	Meat turkey	Broiler	Laying hen	Multispecies	Chicken breeder	Phaesant	Total
Emilia-Romagna*	1	2	1	3			7
Friuli-Venezia Giulia		1					1
Lombardia	4		1			1	6
Piemonte			1		2		3
Veneto	3						3
Total	8	3	3	3	2	1	20

Oubreaks in poultry

- Besides wildlife-mediated introductions, other **risk factors** have been identified:
 - Frequent **movement of transport vehicles**, especially for broiler thinning
 - **Extended loading operations** in large poultry farms
- These risks highlight the importance of **strict, daily biosecurity compliance**, including:
 - Transport vehicle disinfection
 - Cleaning/loading area sanitation
 - Prompt reporting of **mortality increases** or **feed intake drops**, even if mild

Disease control measures as provided by Commission Delegated Regulation (EU) 2020/687

- Epidemiological investigation
- Culling, disposal of carcasses, cleaning and disinfection procedures
- Establishment of protection and surveillance zones (3 and 10 km)
- Restrictions on movements of poultry and poultry products (with derogations)

Genetic Network – Genotype EA-2024-DI.2.1

Genetic data is available for:

18 outbreaks in poultry, including

- 13 commercial farms
- 5 backyard flocks

14 cases in wild birds, mainly

Anatidae

All HPAI H5N1 viruses identified in Italy and analyzed since 29 Sept 2025 belong to the new subcluster of the EA-2024-DI.2 genotype, designated **EA-2024-DI.2.1**

Genetic data indicate that **all events appear to represent primary introductions**, with the exception of **two secondary transmission events** detected in Alessandria Province and between Varese and Novara provinces

Genetic analyses did not reveal any novel mutations associated with mammalian adaptation.

- HPAI H5N1 viruses identified in domestic birds in Italy
- HPAI H5N1 viruses identified in wild birds in Italy
- HPAI H5N1 viruses identified in backyards in Italy
- HPAI H5N1 viruses identified in other European countries

Preventive and risk mitigation measures in place since mid-September

Ministry of Health 15 September 2025, protocol no. 26468

- **Intensification of surveillance in wild bird populations**
- **Adoption of measures to strengthen early detection surveillance**
- **Implementation of measures ensuring a rapid response**
- **Adoption of measures to prohibit outdoor poultry farming**
- **Restocking/housing programme for meat turkeys**
- **Adoption of HPAI prevention and surveillance protocols** in Wildlife Rescue and Rehabilitation Centres
- **Risk-based evaluation** of the possible suspension of markets, fairs, exhibitions
- **Risk-based measures regulating the use of live decoy birds**
- **Provisions for the release and movement of game birds**

Further Restricted Zone in H5PA Veneto and Lombardia

Italian Ministry of Health, 16 October 2025 protocol no. 30074

Main preventive/risk mitigation measures

- Census and confinement
- Enhanced biosecurity
- Movements control
- Restrictions on productive activities:
 - Ban of broiler thinning
 - Ban of markets, fairs, exhibitions
 - Ban on release of game birds for restocking or hunting purposes
 - Ban of meat turkey restocking
- Increased monitoring
- Age limits on slaughtering for meat turkey
- Pre-movement clinical inspection and virological testing
- Enhanced active surveillance for AI in wild birds

Thank you
