Weelde	HPAI H5N1	25/10/2025	Poultry: chicken breeders
Dilsen-Stokkem	HPAI H5N1	20/11/2025	Poultry: laying hens
Kinrooi	HPAI H5N1	22/11/2025	Poultry: rearing laying hens
Pelt (1)	HPAI H5N1	23/11/2025	Poultry: laying hens
Pelt (2)	HPAI H5N1	24/11/2025	Poultry: broilers
Gembloux	HPAI H5N1	23/11/2025	Poultry: organic broilers
La Bruyère (1)	HPAI H5N1	23/11/2025	Poultry: chicken breeders
La Bruyère (2)	HPAI H5N1	25/11/2025	Poultry: meat ducks
Oudenaarde	HPAI H5N1	03/12/2025	Captive birds: hobby holder

Summary of the outbreaks in Belgium since 01/10/2025

Place	Strain	Date	Type holding
Veurne 1	HPAI H5N1	23/12/2025	Poultry: chicken breeders
Alveringem	HPAI H5N1	9/01/2026	Poultry: chicken breeders
Wingene	HPAI H5N1	10/01/2026	Poultry: meat turkeys
Veurne 2	HPAI H5N1	12/01/2026	Poultry: laying hens
Veurne 3	HPAI H5N1	12/01/2026	Poultry: broilers
Poperinge	HPAI H5N1	13/01/2026	Poultry: broilers
Veurne 4	HPAI H5N1	15/01/2026	Poultry: broilers
De Panne	HPAI H5N1	16/01/2026	Poultry: broilers
Vleteren	HPAI H5N1	18/01/2026	Poultry: broilers
Diksmuide	HPAI H5N1	19/01/2026	Poultry: broilers

Zones and outbreaks in Belgium 19/01/2026

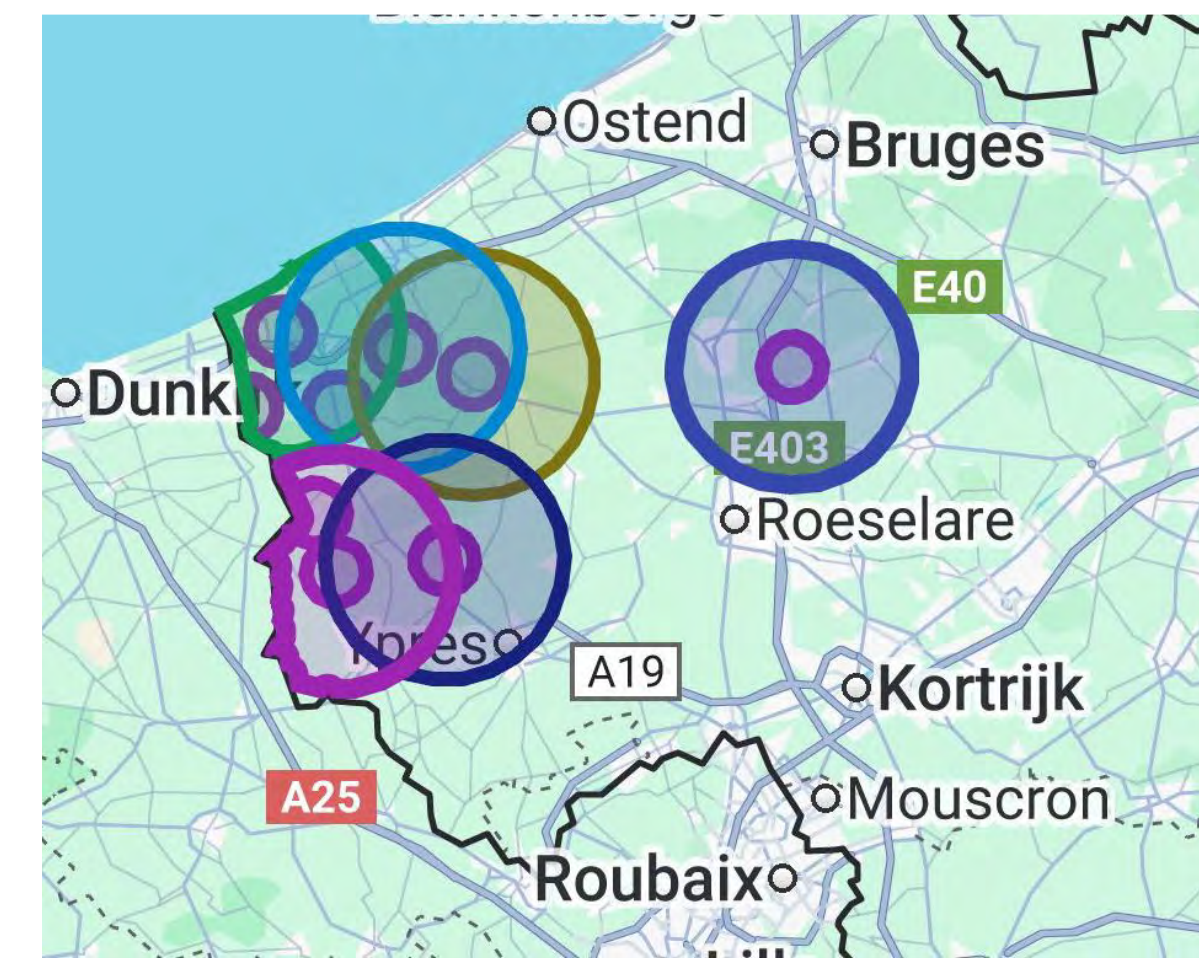

Outbreaks of HPAI H5N1 in Poultry Veurne 1

- o Veurne: Province of West Flanders
- o Commercial farm with 44,000 breeders
- o Confirmation outbreak: 23th December 2025
- o Increased mortality
- o Source : likely wild birds

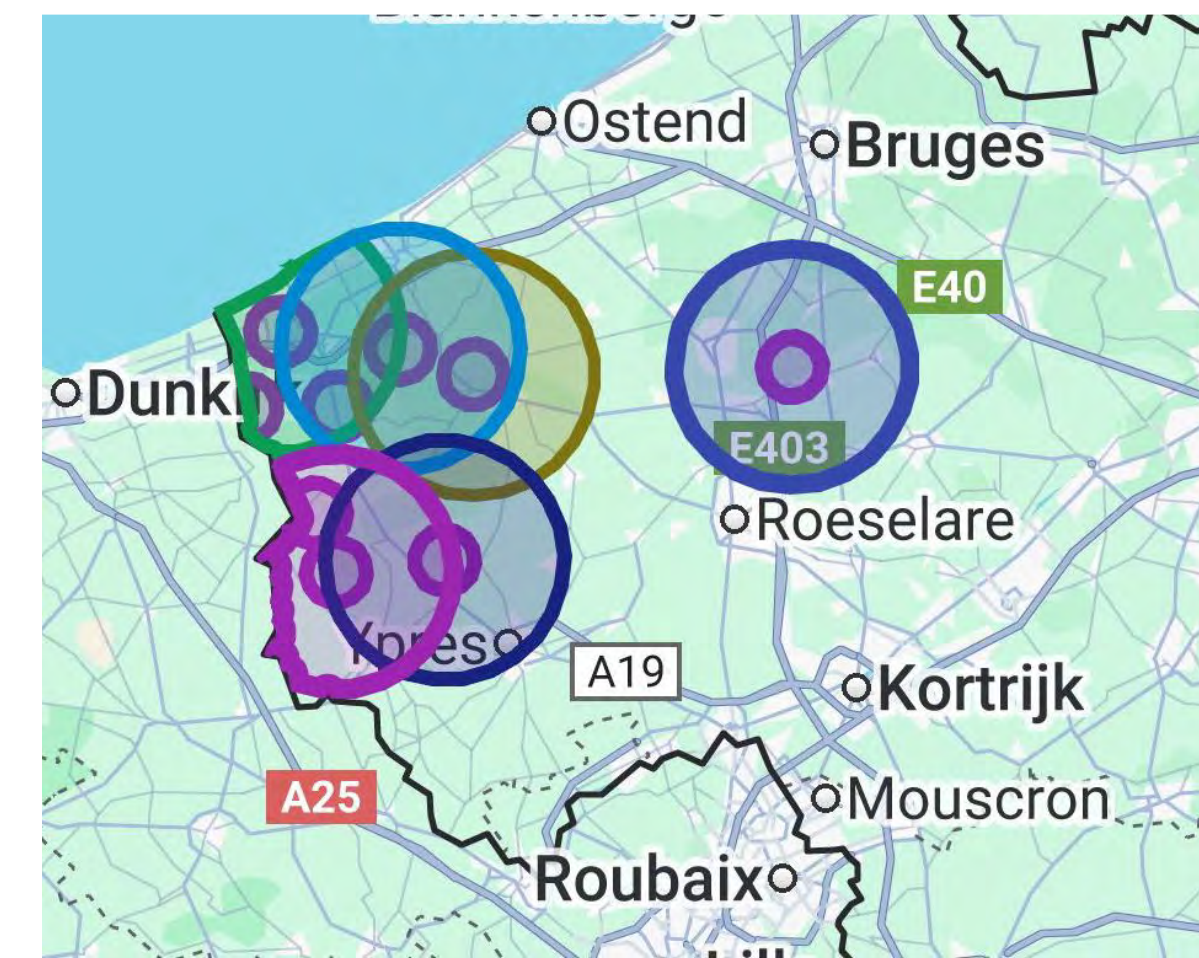

Outbreaks of HPAI H5N1 in Poultry Alveringem

- o Alveringem: Province of West Flanders
- o Commercial farm with 57,000 breeders
- o Confirmation outbreak: 9th January 2026
- o Increased mortality
- o Source : likely wild birds

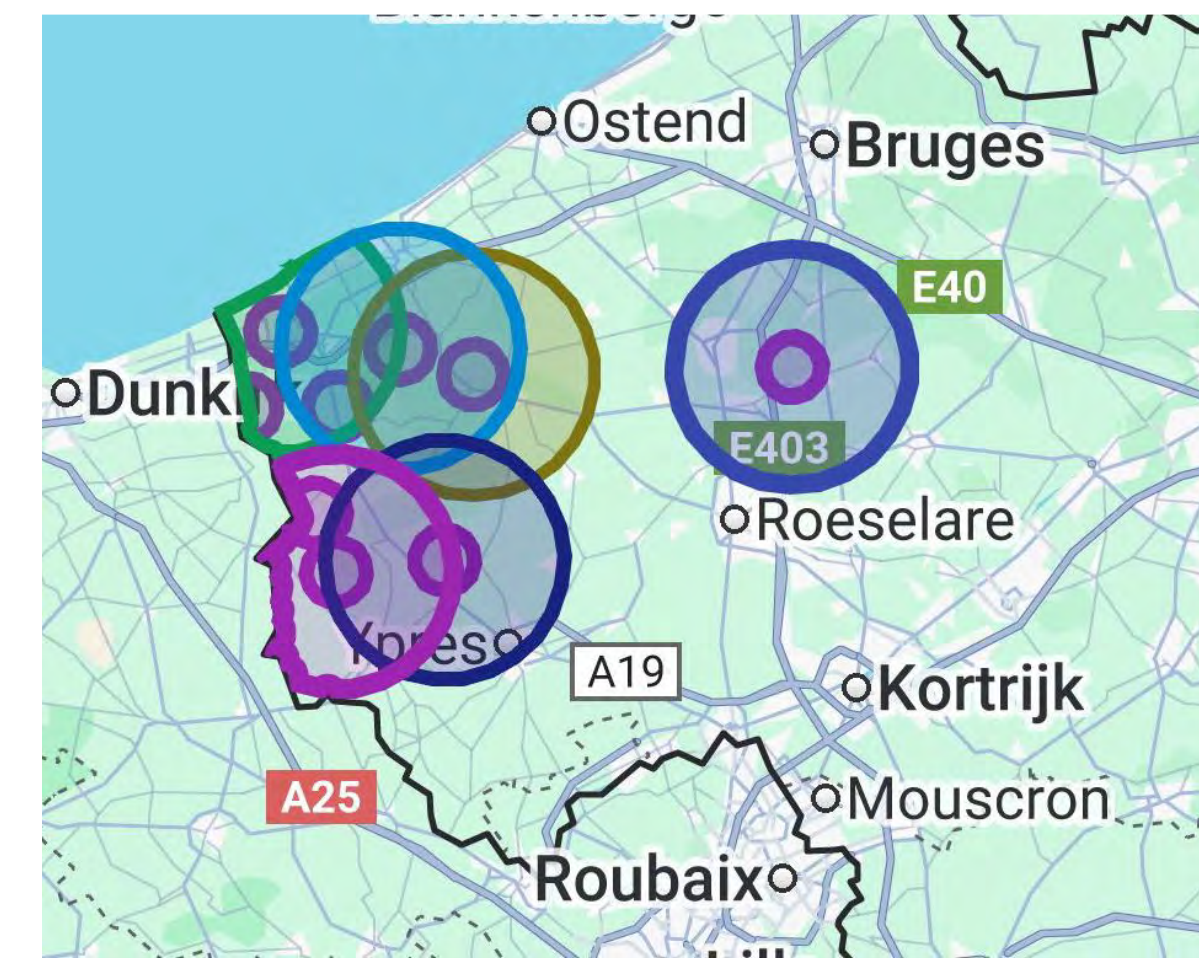

Outbreaks of HPAI H5N1 in Poultry Wingene

- o Wingene: Province of West Flanders
- o Commercial farm with 3,589 meat turkeys
- o Confirmation outbreak: 10th January 2026
- o Increased mortality
- o Source : likely wild birds

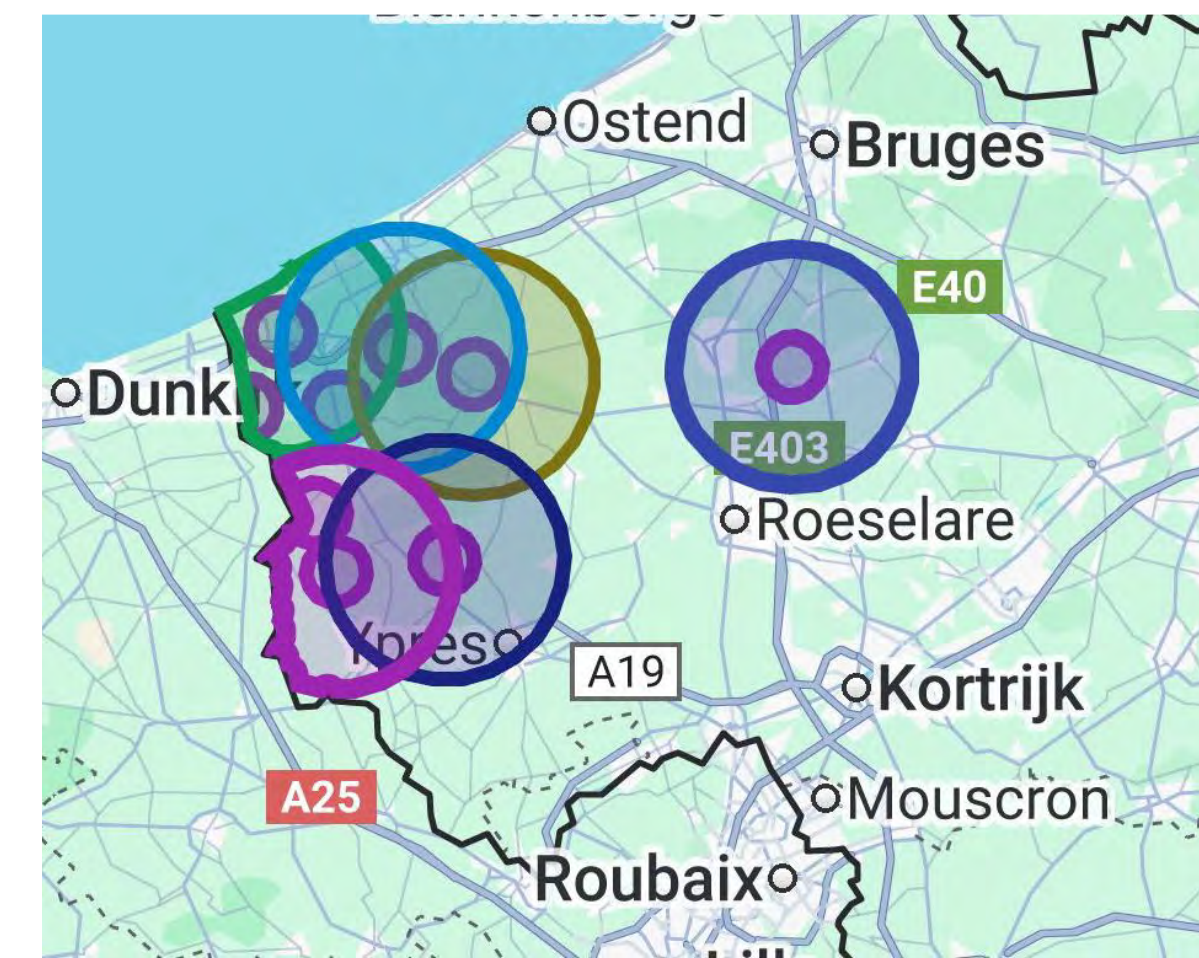

Outbreaks of HPAI H5N1 in Poultry Veurne 2

- o Veurne: Province of West Flanders
- o Commercial farm with 38,850 laying hens
- o Confirmation outbreak: 12th January 2026
- o Increased mortality
- o Source : likely wild birds
- o Mixed farm: cattle are being monitored and will also be tested

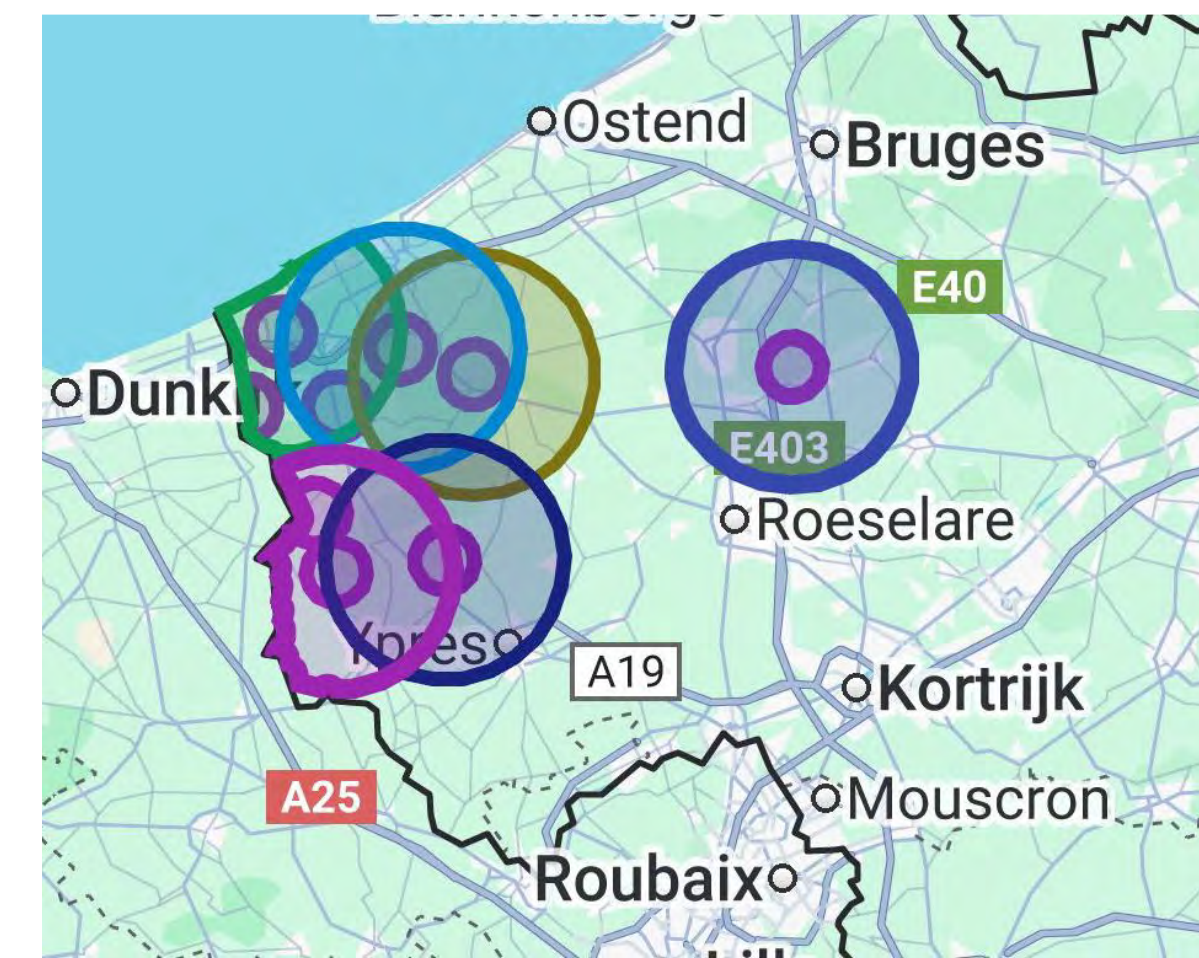

Outbreaks of HPAI H5N1 in Poultry Veurne 3

- o Veurne: Province of West Flanders
- o Commercial farm with 84,189 broilers
- o Confirmation outbreak: 12th January 2026
- o Increased mortality
- o Source : likely wild birds
- o Mixed farm: cattle are being monitored and will also be tested

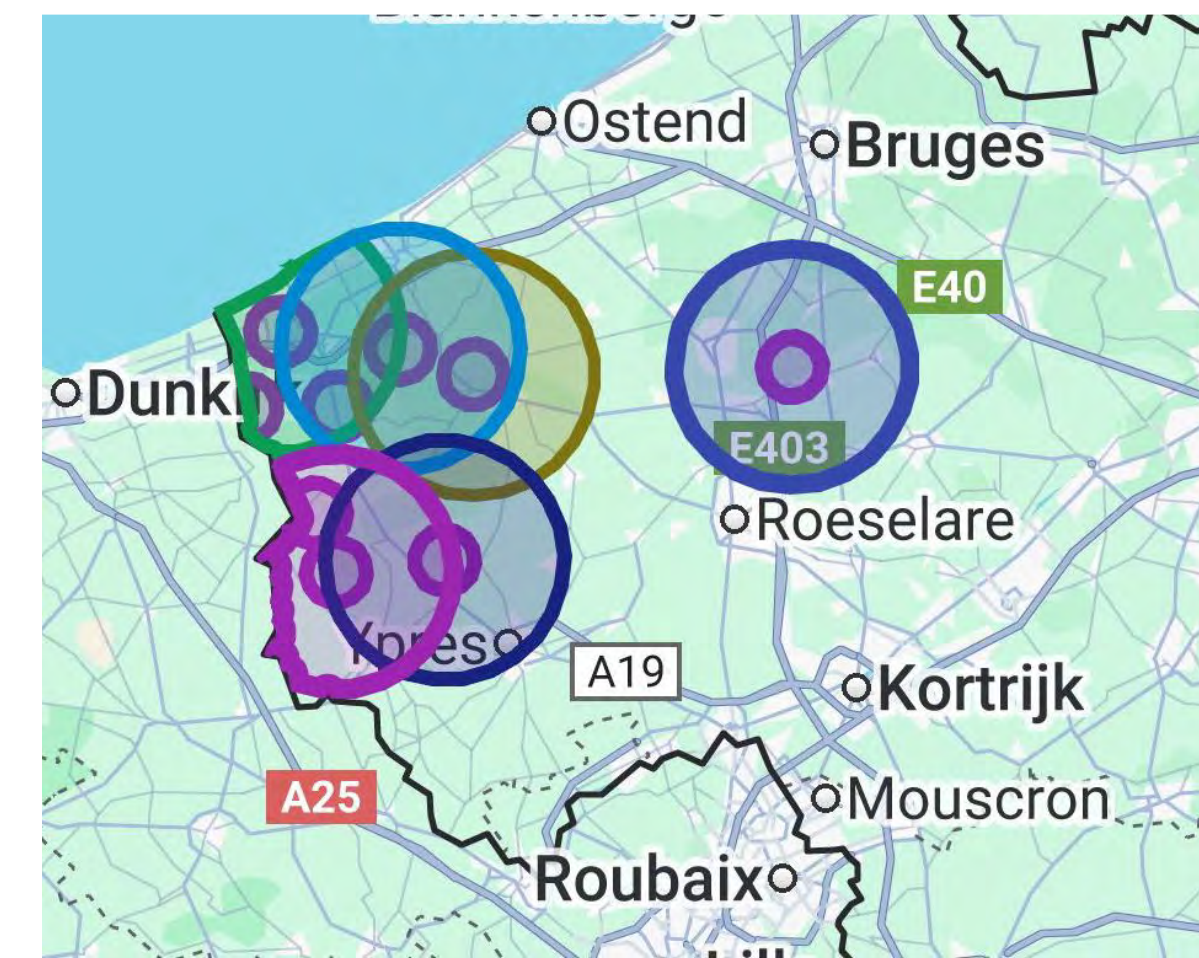

Outbreaks of HPAI H5N1 in Poultry Poperinge

- o Veurne: Province of West Flanders
- o Commercial farm with 72,825 broilers
- o Confirmation outbreak: 13th January 2026
- o Increased mortality
- o Source : likely wild birds

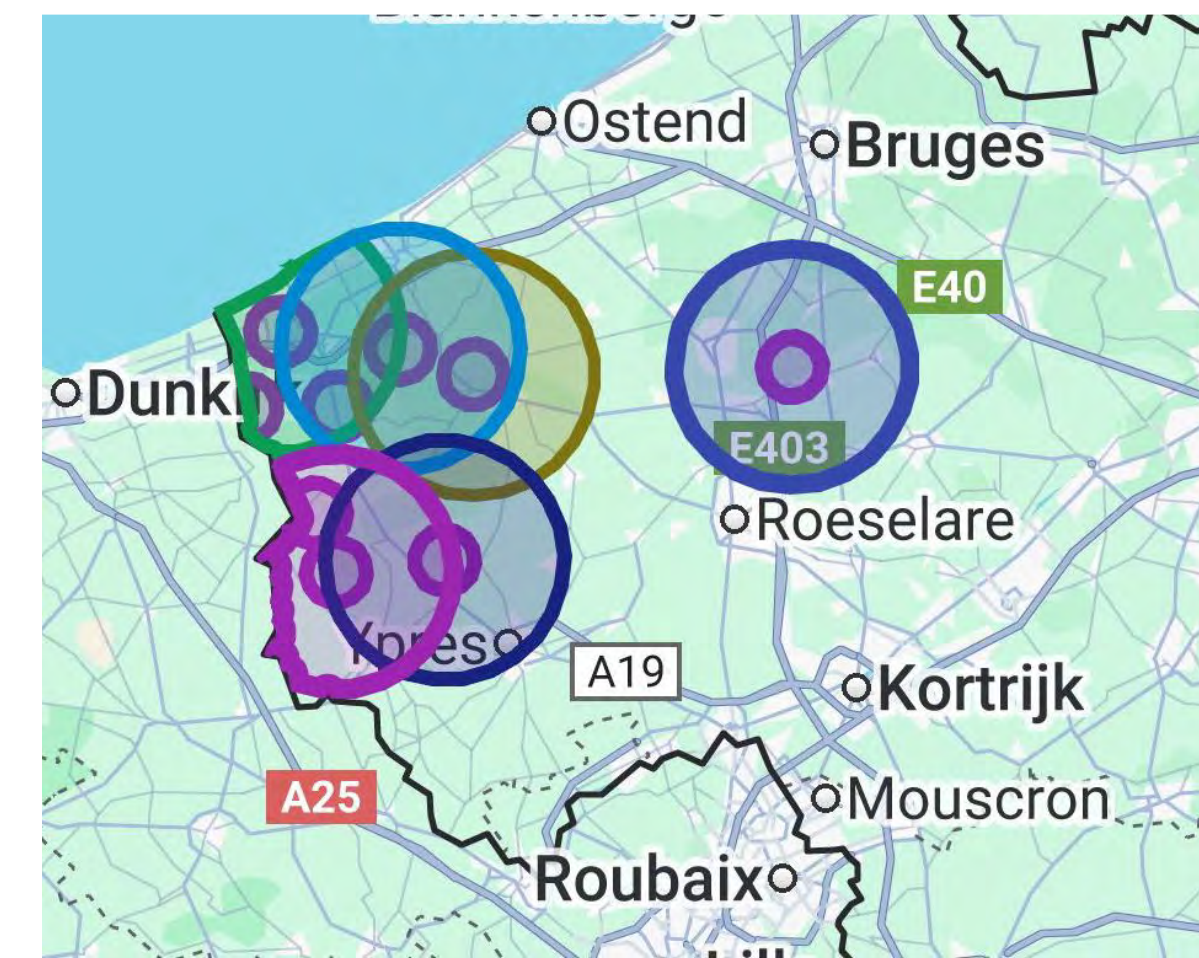

Outbreaks of HPAI H5N1 in Poultry Veurne 4

- o Veurne: Province of West Flanders
- o Commercial farm with 188,500 broilers
- o Confirmation outbreak: 15th January 2026
- o Increased mortality
- o Source : likely wild birds
- o Mixed farm: cattle are being monitored and will also be tested

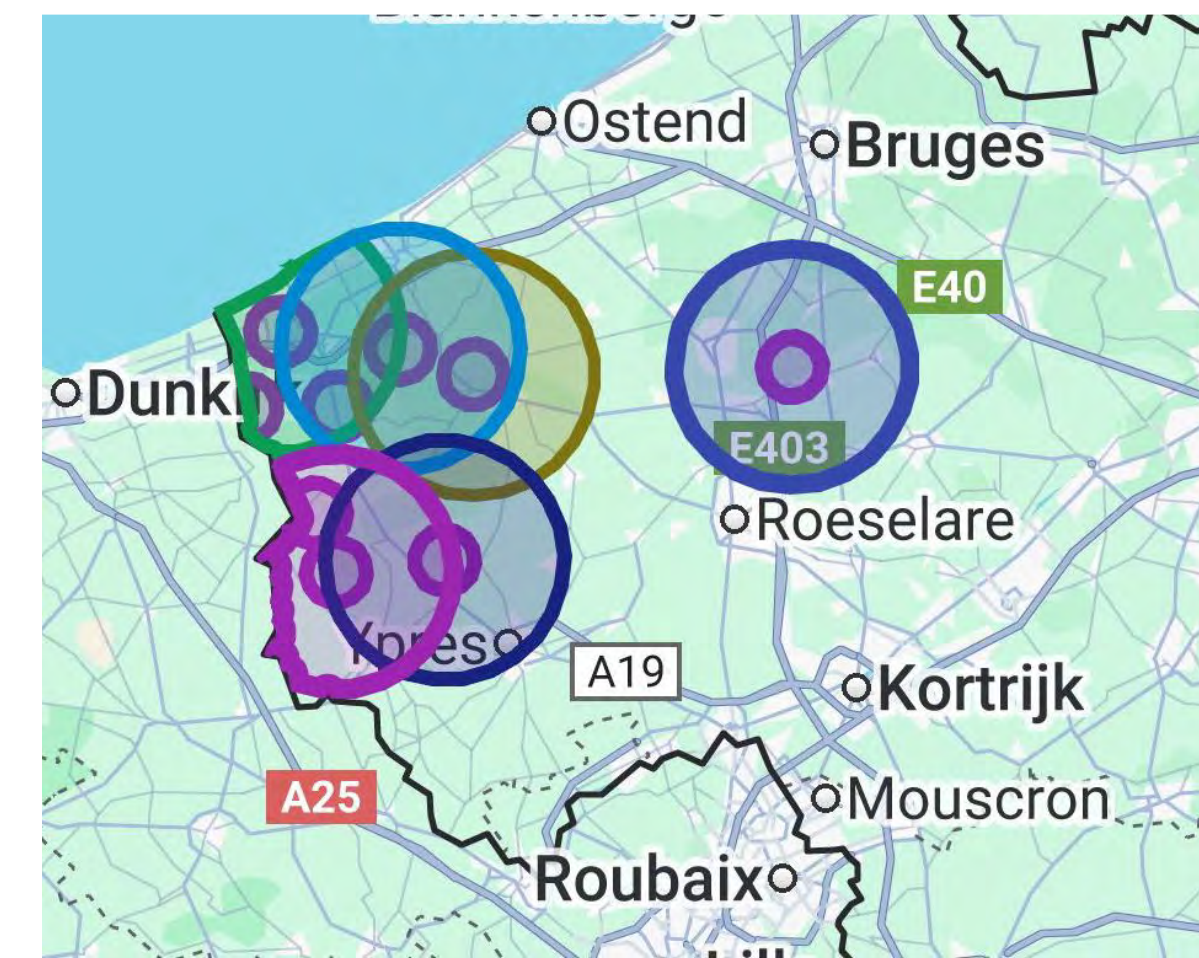

Outbreaks of HPAI H5N1 in Poultry De Panne

- o De Panne: Province of West Flanders
- o Commercial farm with 85,508 broilers
- o Confirmation outbreak: 16th January 2026
- o Increased mortality
- o Source : likely wild birds

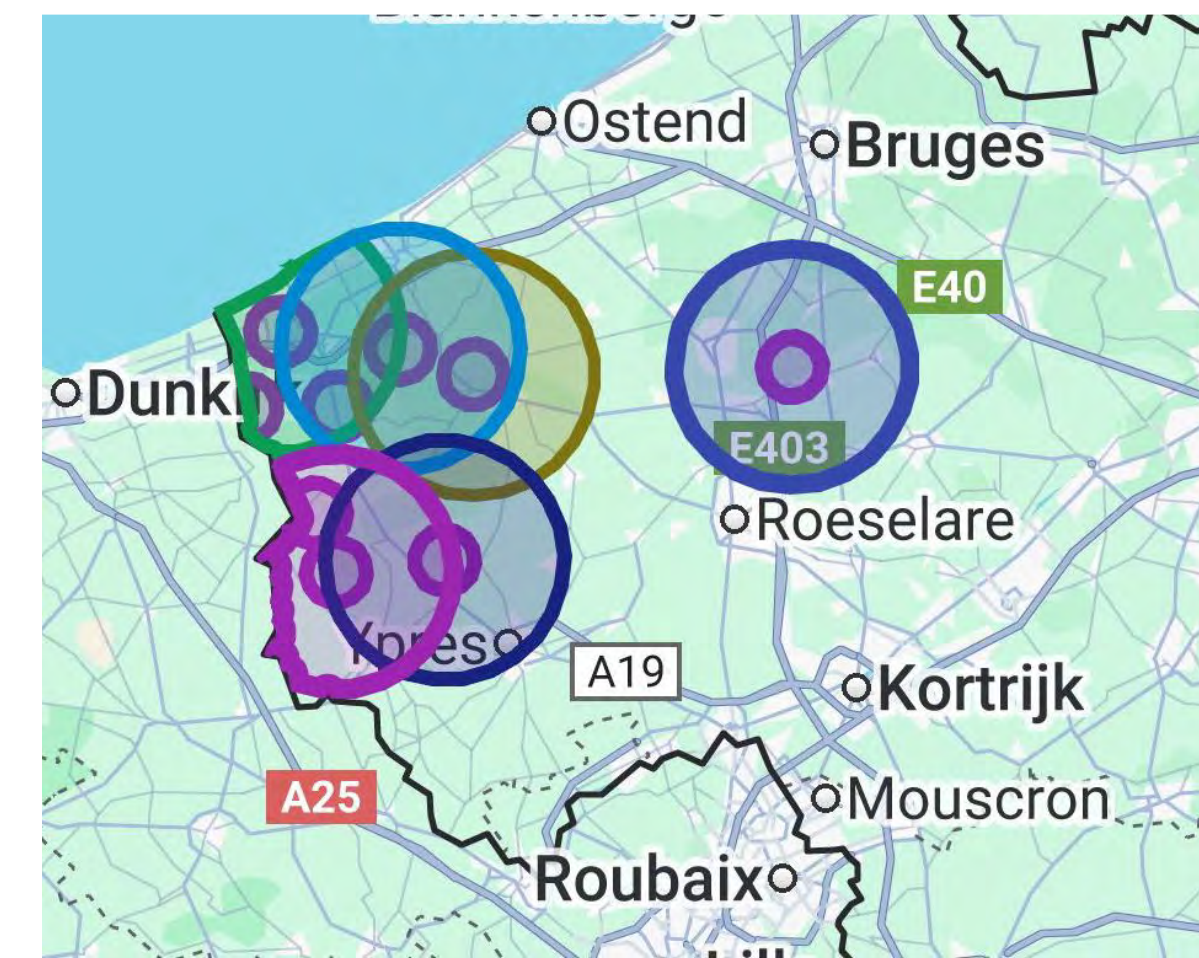

Outbreaks of HPAI H5N1 in Poultry Vleteren

- o Vleteren: Province of West Flanders
- o Commercial farm with 39,132 broilers
- o Confirmation outbreak: 18th January 2026
- o Increased mortality
- o Source : likely wild birds

Outbreaks of HPAI H5N1 in Poultry Diksmuide

- o Diksmuide: Province of West Flanders
- o Commercial farm with 44,374 broilers
- o Confirmation outbreak: 19th January 2026
- o Increased mortality
- o Source : likely wild birds

Outbreaks of HPAI H5N1

Measures in captive birds and Poultry

- o Culling of all captive birds and poultry in all the outbreaks
- o Litter removed, cleaning and disinfection
- o Protocol for restocking with at least a 3-week sanitary vacuum
 - Repopulation after approval by the FASFC
- o Establishment of **Protection** (3 km) and **Surveillance** (10 km) zones around all outbreaks in poultry
- o **The epidemiological inquiries and the genotyping are ongoing**

Outbreak of HPAI H5N1 in poultry

Additional measures in the whole territory – Increased risk period

- o Increased risk period declared on 15 November 2021: measures adapted following the epidemiological situation -> **measures reinforced on the 23rd October 2025** :
 - Mandatory confinement or protection of all poultry and captive birds of registered holdings
 - Mandatory drinking and feeding inside or protected for poultry and captive birds
 - Prohibition of watering of poultry and captive birds with surface water or rainwater
- o **Increased daily biosecurity**
