

Highly pathogenic avian influenza

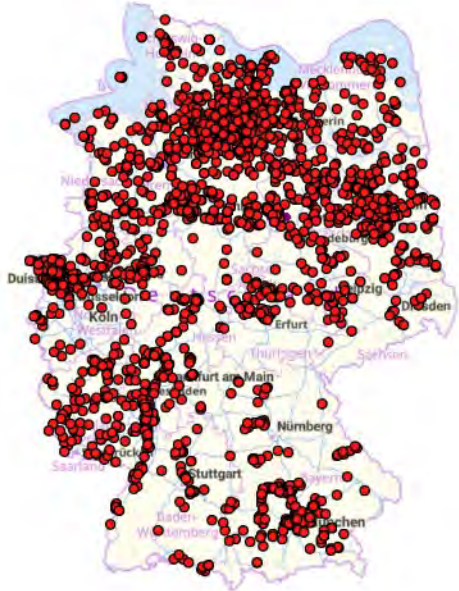

Current Situation in Germany

SCoPAFF-meeting January 2026

Situation in wild birds

Level of **HPAI** cases in wild birds **decreases**

CASES WILD BIRDS / MONTH
2025/2026

September '25 - January 2026

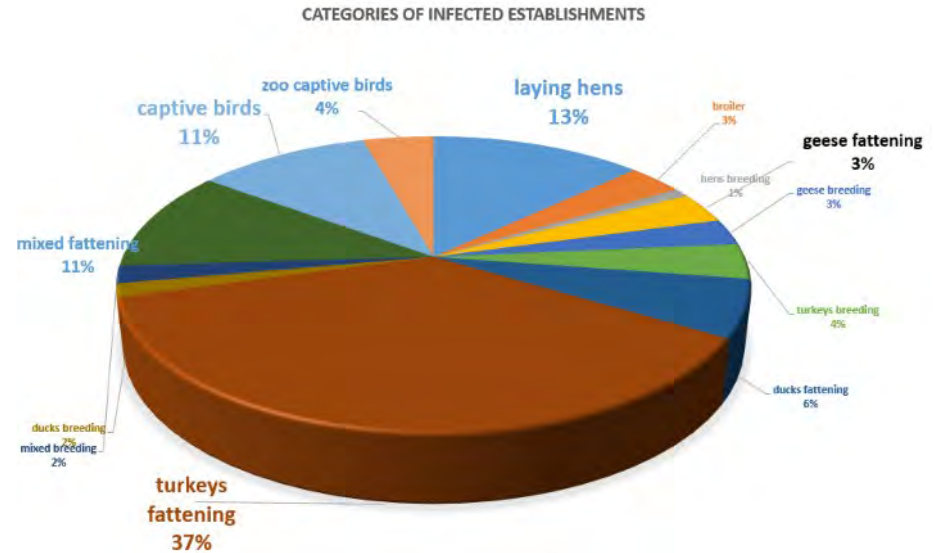

January 2026

Situation in **poultry** and **captive birds**

Period of time	Number of outbreaks
Active outbreaks on 20/01/2026	53
New from 15/12/2025 (~last PAFF) until 20/01/2026	24 Zoo: 2 Poultry: 13 NON-Poultry: 9
“Season” from 01/09/2025 until 20/01/2026	205 (152 lifted)

Situation in **poultry** and **captive birds**, 20/01/2026

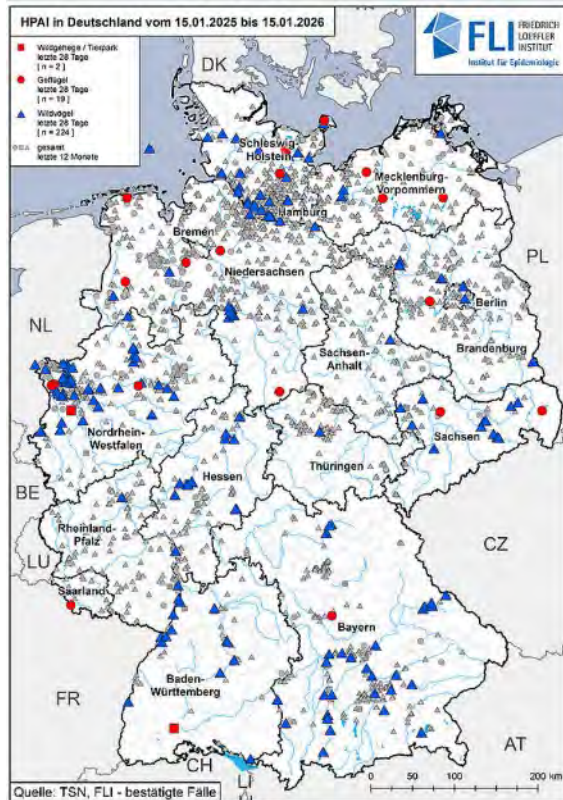

“active” outbreaks → measures are in place

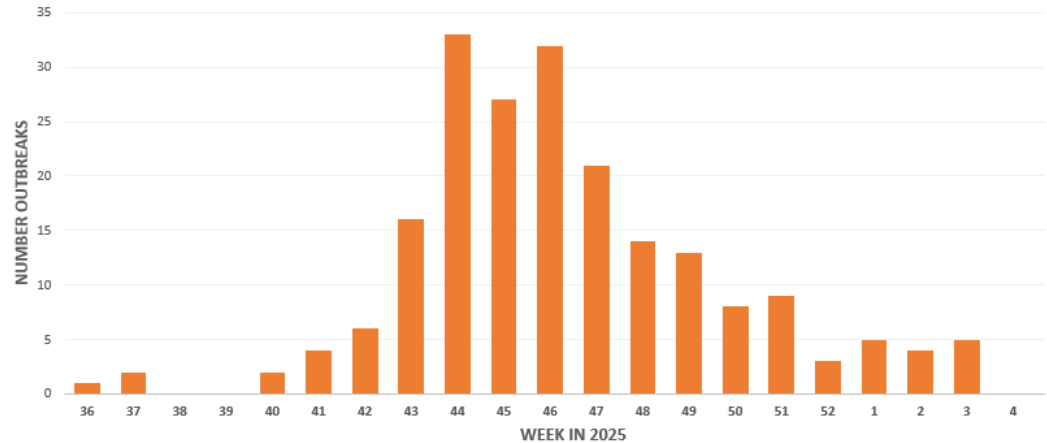

Establishments:

Poultry and captive birds since 01/09/2025

Evolution: Poultry and captive birds

Number of outbreaks per week 01/09/2025 to 20/01/2026

Summary

- **HPAI Peak** appears to have been **overcome**:
 - Number of cases in **wild birds are declining significantly**
 - Number of cases in **poultry decreased** since last PAFF
- Situation is **under control, no chains of infection**
- However risk assessment FLI (12/01/2026) still results in **high risk**

<https://www.fli.de/en/news/animal-disease-situation/avian-influenza-ai-fowl-plague/>

- Conclusion: **Awareness** and **biosecurity** still of **high importance**
