Ile-de-France	2
Bretagne	3

Weekly trend of HPAI outbreaks in France since August 1, 2025

Distribution of the outbreaks as of the 12th of February 2026 per species

HPAI Epizootic situation in France : **GENERAL MEASURES**

→ Control measures in accordance to R UE 2020/687:

- Stamping out in outbreak
 - Protection zone (PZ) and surveillance zone (SZ) with reinforced surveillance and movement restrictions.
-

HPAI Epizootic situation in France : **GENERAL MEASURES**

High national risk level since October 22nd 2025

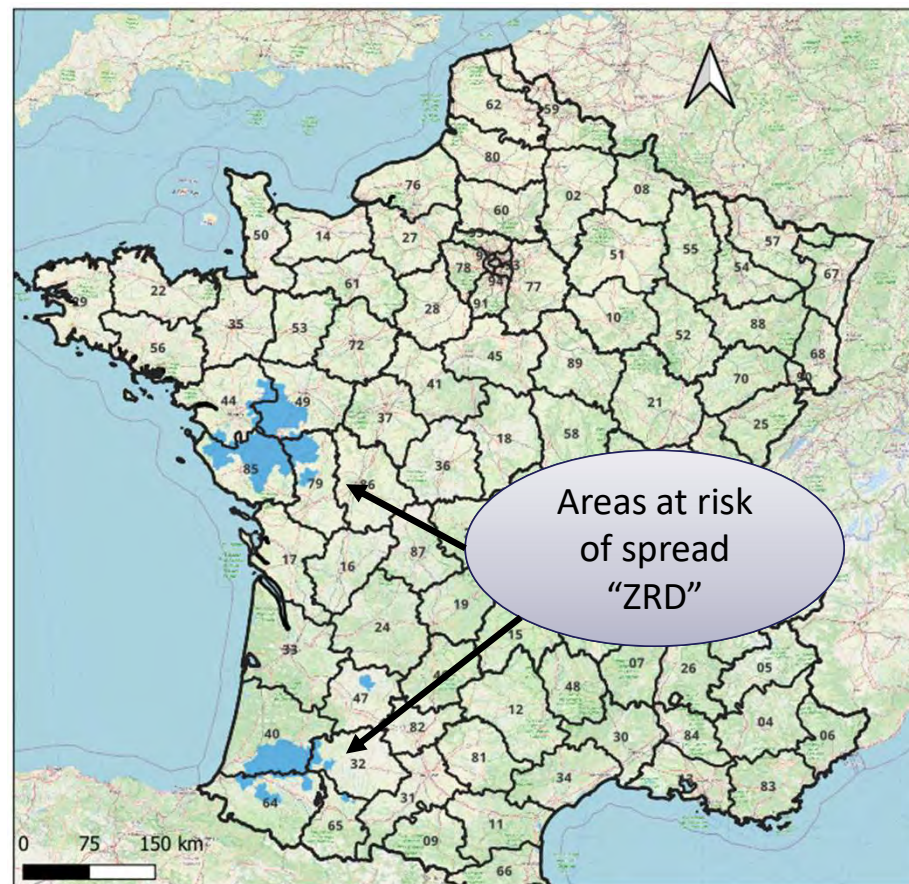

The HPAI risk level was raised to “HIGH”. This decision entails the implementation of prevention and biosecurity measures:

→ **For the entire territory:**

- Sheltering for poultry of all species;
- Implementation of enhanced biosecurity measures during the transport of waterfowl;
- Specific conditions for the transport and use of decoys; Restrictions on the use of decoys depending on the category of owner;
- Conditions prior to the movement of game birds; Ban on gatherings of birds.

→ **Areas at risk of spread (ZRD):**

- Virological testing before moving palmipeds between two farms.

HPAI Epizootic situation in France : POULTRY AND CAPTIVE BIRDS

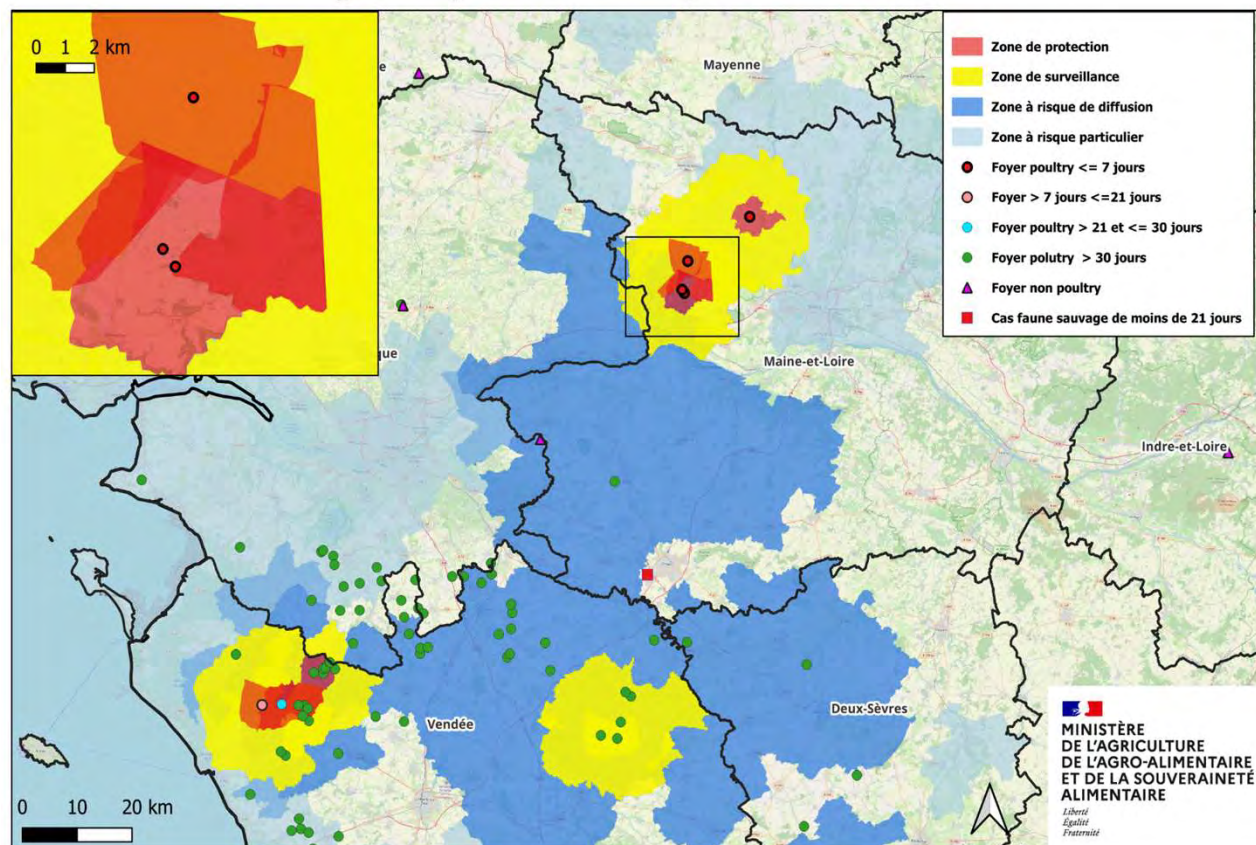

Focus on Vendée and Maine et Loire

Poultry outbreaks :

- **58 outbreaks** were confirmed in Vendée, between October 2025 and the 20th of January 2026.
- **32** of those outbreaks in Vendée occurred in duck farms.
- **5 outbreaks** were confirmed in Maine et Loire in February 2026.

Captive birds outbreaks :

- 1 outbreak confirmed in Vendée on October 15, 2025

Last update: 2026.02.12

HPAI Epizootic situation in France : **SPECIFIC TEMPORARY MEASURES**

Applied measures

Established in 4 Departments (85, 44, 49 and 79) :

→ **Surveillance :**

- Virological test 48 hours before movement between 2 farms is mandatory for fattening palmipeds held in commercial establishments.

→ **Vaccination of ducks**

- Administration of a third dose of vaccine to all duck farms in the department 85 and in PZ/SZ and ZRD zones for departments 44, 49, and 79. The third dose is required for animals slaughtered beyond 77 days of age.

→ **Biosecurity**

- Obligation to remove animals in a single operation: for duck and turkey farms in PZ
- Strict sheltering of ducks
- Tarpaulin covers must be used on vehicles in PZ/SZ and ZRD zones.

Departements concerned by the reinforced measures

-> The measures will be maintained at least until March 31.
