

Avian influenza

Epidemiological situation in Poland

General Veterinary Inspectorate
22-23 April 2026

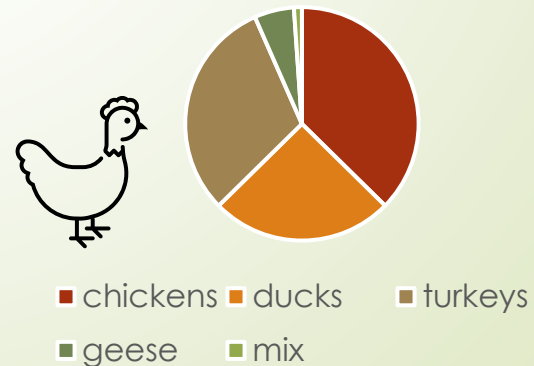

Legend:

- Ongoing outbreaks in poultry
- Resolved outbreaks in poultry
- Outbreaks in wild birds
- Outbreaks in captive birds

Epidemiological situation since 1st January 2026

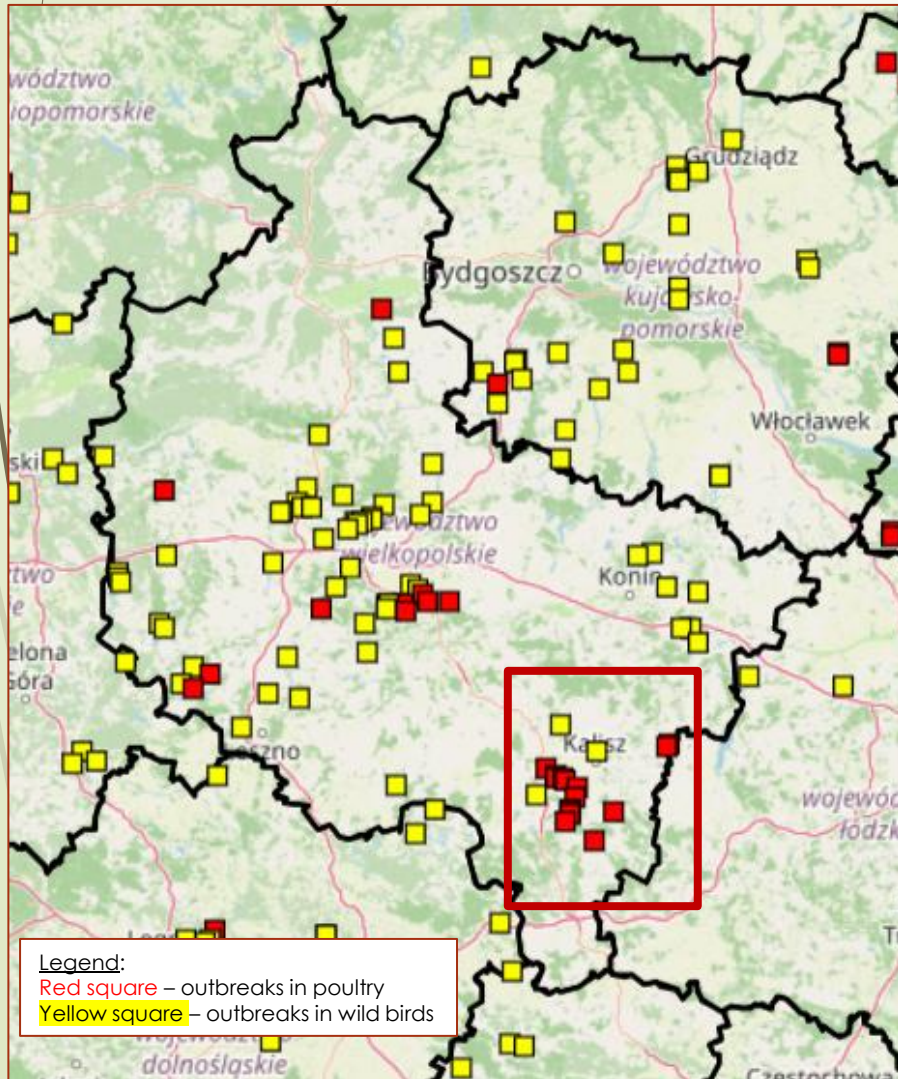

Voivodeship	Number of outbreaks	Number of birds
dolnośląskie	1	24 098
kujawsko-pomorskie	7	119 053
lubelskie	8	312 403
lubuskie	2	44 133
łódzkie	2	20 000
mazowieckie	23	1 999 590
podlaskie	2	69 061
pomorskie	2	25 612
śląskie	2	44 498
warmińsko-mazurskie	13	416 980

birds**

Epidemiological situation in poultry in warmińsko-mazurskie region

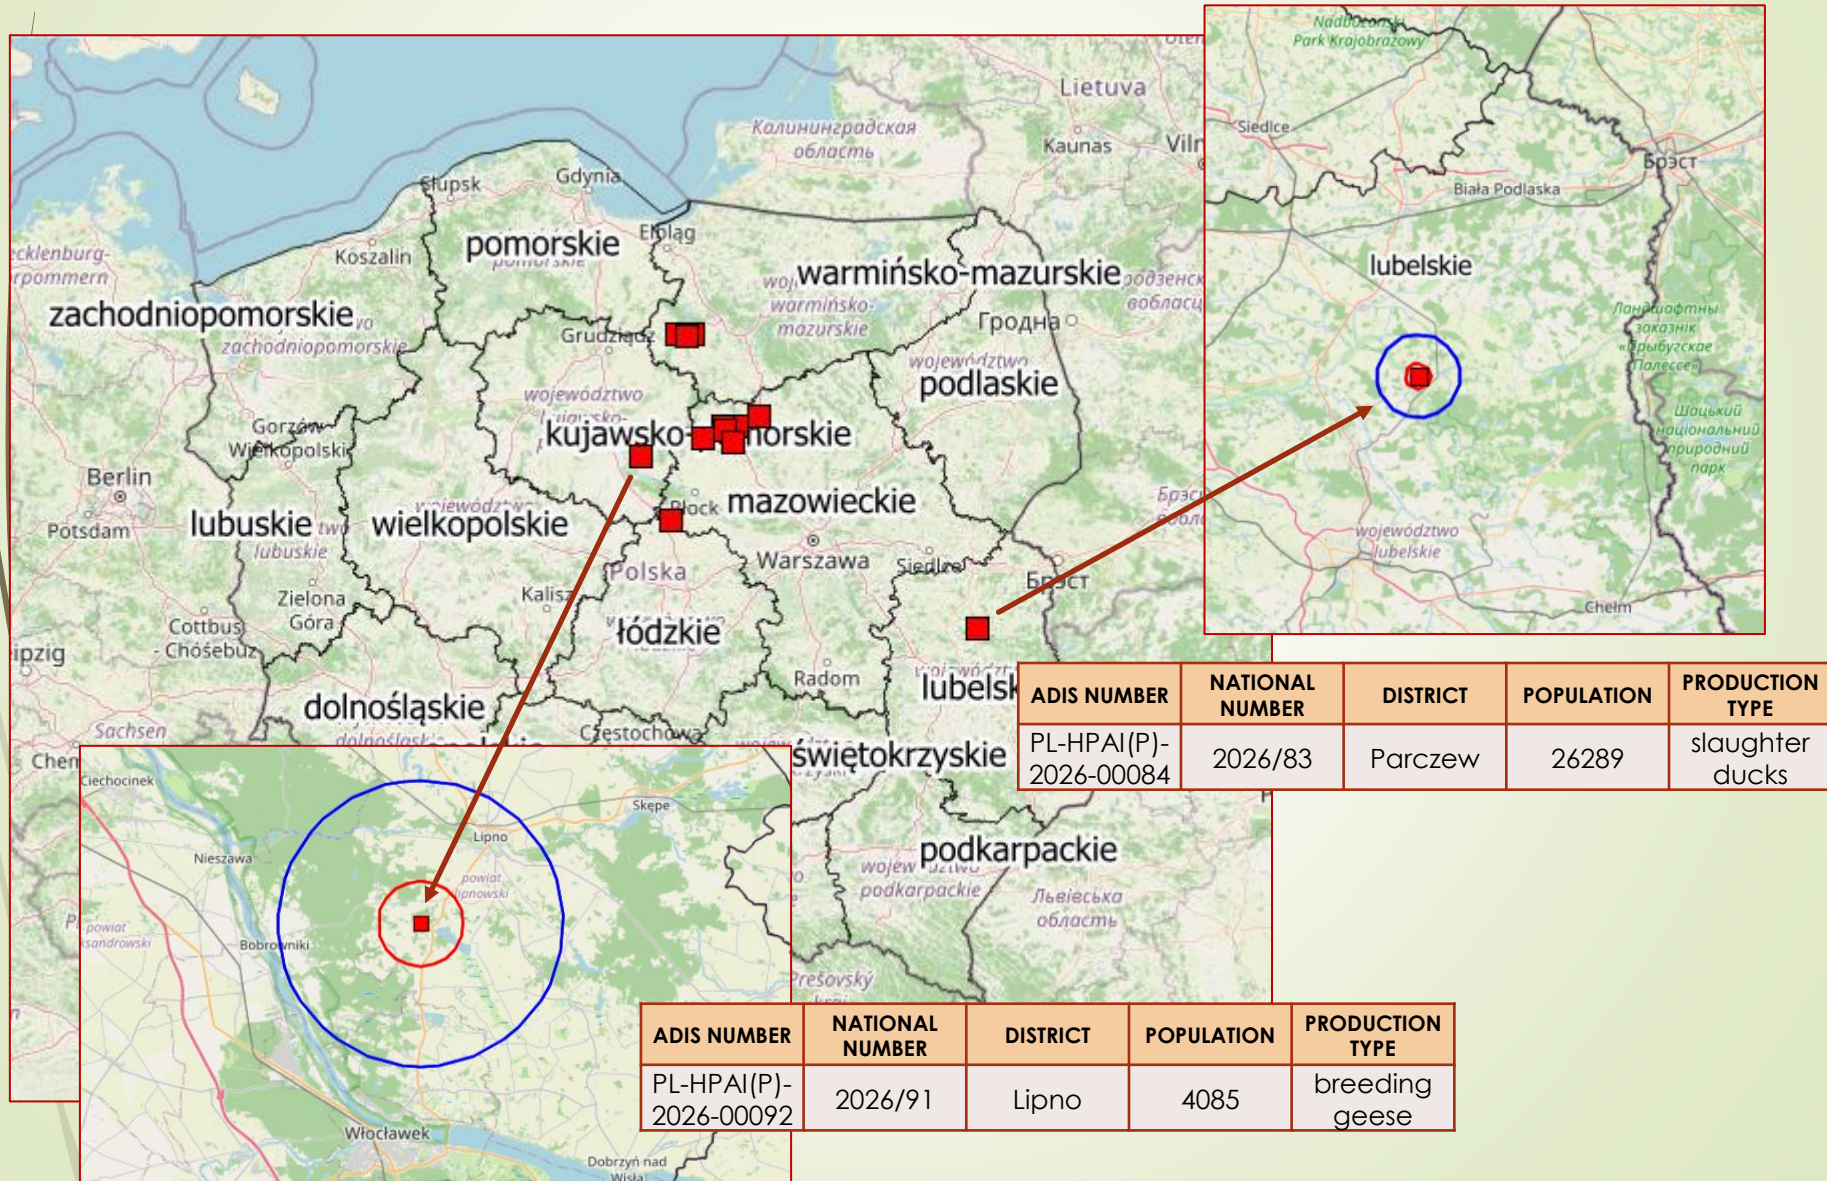

8 outbreaks

slaughter
turkeys

177 939
birds

Epidemiological situation in poultry in lubelskie and kujawsko-pomorskie region

Epidemiological situation since 1st January 2026

CAPTIVE BIRDS

Voivodeship	Number of birds	Number of outbreaks
Dolnośląskie	94	1
Lubuskie	11	1
Łódzkie	26	1
Mazowieckie	511	3
Pomorskie	91	3
Warmińsko-mazurskie	47	1
Wielkopolskie	220	1
Zachodniopomorskie	264	4
In total	1304	15

Situation in captive birds

PL-HPAI(NON-P)-2026-00226 – mazowieckie region

PL-HPAI(NON-P)-2026-00227 – pomorskie region

PL-HPAI(NON-P)-2026-00228 – lubuskie region

Epidemiological situation since 1st January 2026

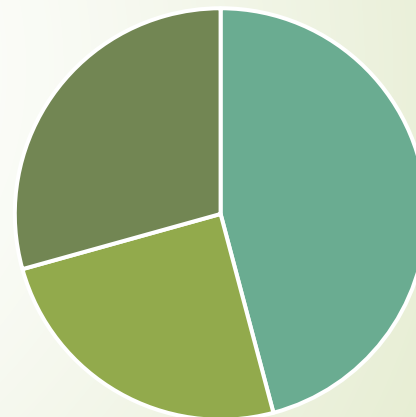

WILD BIRDS

Voivodeship	No. of outbreaks	Nos. of birds
dolnośląskie	14	35
kujawsko-pomorskie	26	33
lubelskie	3	7
lubuskie	12	44
łódzkie	6	13
małopolskie	4	5
mazowieckie	10	15
opolskie	8	22
podkarpackie	2	2
podlaskie	3	3
pomorskie	33	59
śląskie	2	2
świętokrzyskie	1	1
warmińsko-mazurskie	10	19
wielkopolskie	54	81
zachodniopomorskie	25	80
SUMMARY	213	421

Outbreaks in wild birds in 2026

Most common species affected in Poland

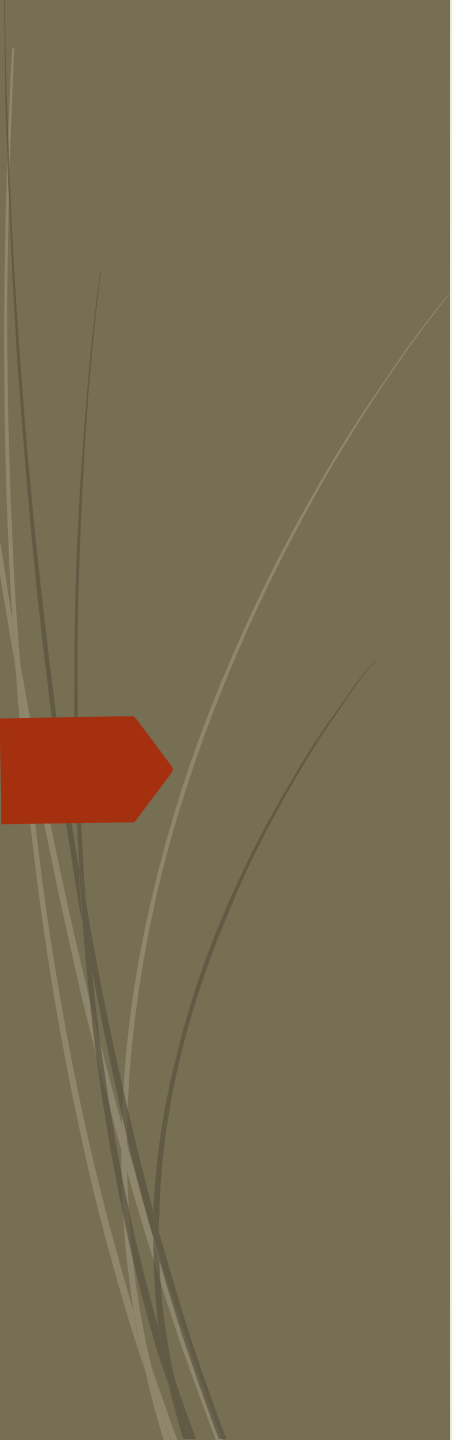

■ mute swan ■ eurasian buzzard ■ greylag goose

WGS analysis

- WGS are ordered by competent authorities for each HPAI outbreak in poultry and captive birds. Additionally, as part of the epizootic investigation, WGS tests are also ordered for wild birds.
- WGS results show that **wild birds** played a dominant role in the transmission of highly pathogenic avian influenza (HPAI) during the 2025/2026 season, acting as a major reservoir and source of virus introduction into poultry populations. The **unusually high number** of detections, early onset, and sustained environmental pressure made it a particularly severe season in epidemiological terms.
- Due to new HPAI outbreaks across the country, WGS tests have been ordered. Competent authorities are currently awaiting their results.

Thank you
